

2008 Iowa Tests of Basic Skills - Results

National School Norms: This information "ranks" our school by comparing the average score of our students to the average score of students in other schools across the nation. So, if we score 98 on the national school norm in any given area, our average student score ranked in the 98th percentile compared to all of the other schools.

2008 Iowa Tests of Basic Skills - Results

National Student Norms: This information shows the average score of our students. For example, if our national student norm was 80, this is the average score of all of our students at that grade level at our school. That is, our average student scored in the 80th percentile compared to every other child in the nation. So, our average child would have had a score of 80 on the report sent home.
